Languages:	Java, Python(Decent), JavaScript, HTML, CSS
Frameworks:	Flask, Django(Decent)
Tools/Platforms:	Git, GitHub, VS Code, MySQL, MongoDB(Decent)
Soft Skills:	Leadership, Problem-Solving Skills, Team Player, Communication, Adaptability

PROJECTS

Eco-Valuate : Built a minor-project with team which is a sustainable technology solution designed to address the growing global e-waste crisis. The project provides an automated platform that identifies valuable electronic components within discarded Printed Circuit Boards (PCBs) and provides real-time financial estimates based on the current market value of the precious metals they contain. ([-GitHub Link-](#))

TrustPulse : Build a project that is Multi-Platform Company Review Aggregator which simplifies how users evaluate a company’s reputation by eliminating the need to check multiple websites manually. When a user inputs a company name, the system simultaneously fetches user reviews and numerical ratings from major platforms like Google Reviews, Trustpilot, Indeed, and Glassdoor. ([-GitHub Link-](#))

Stock Sense : Built a project that is designed to efficiently manage, monitor, and update stock levels across products, ensuring real-time visibility into inventory status. It helps businesses reduce errors, prevent stockouts or overstocking, and streamline supply chain operations. ([-GitHub Link-](#))

CERTIFICATIONS

- Certification of Computer Networks and Internet Protocol by NPTEL.
- Certification of AWS Academy Cloud Foundations.
- Certification of participation in VADODARA HACKATHON 6.0.
- Certification of participation in Guidewire DEV-Trails Hackathon.
